Cost effective Wash Plant

Better with Kemper

Portability of Wash Plant Provides Cost Effective Solution for 250 tph
Trap Rock Operation

SPECS: Terex Simplicity 6'x 16' triple deck wash screen with twin fine material washer (TXW616T rubber tire plant) along with 9'x 14' Kemper hopper with 36" x 17' belt feeder and (3) Kemper 30" x 80' stackers.

CHALLENGE: The need to feed material, wash and reintroduce a 2"- product into existing operation. Limited reserves required the plant to have portability so it could be used on other sites in the future

SOLUTION: Production and portability being key, Kemper designed and provided a wash system that worked within a tight existing footprint. Plant feed conveyors were extended for accessibility. Kemper hopper/feeder unit and Kemper radial stackers completed the system which increased volume while decreasing handling costs

For innovation, knowledge,
safety and commitment, trust
